Screenshots:

The collage illustrates the process of installing and using CUPS Windows drivers. It includes several key elements:

- Choose Driver:** A window showing a list of available drivers, including 'Color LaserJet PCL 6 CUPS' and 'LaserJet PCL 6 CUPS'.
- Common UNIX Printing System 1.3.7:** A welcome screen with information about the system and links for printer drivers and assistance.
- Printer Configuration:** A window for configuring an HP LaserJet 1018 printer, showing fields for description, location, URL, and model.
- Flowchart:** A diagram showing the flow of data from an internal system through a graphical device interface (GDI) and an enhanced metafile (EMF) to a printer driver (which may be PostScript, PCL, Epson, or whatever), then through a converter to a print-ready file (which may be PostScript, PCL, Epson, or whatever), and finally to a printer (which may be PostScript, PCL, Epson, or whatever).
- Printer Images:** Images of various printers, including a Samsung printer, an HP printer, a Lexmark printer, and a Lexmark 450 Turbo printer.
- Print Dialog:** A screenshot of a print dialog box showing settings for printer, media type, paper source, and print quality.
- Network Settings:** A screenshot of a network settings window showing options for network protocols like CUPS Network Server, LPD-Style Network Server, and SMB Network Server.
